2. 25 to 40%

>Of the 67 million dogs and 77 million cats in the United States it is estimated that anywhere between 25 to 40 % are overweight.

>And Just like obese people, obese pets are also prone to diabetes, heart problems, joint and hip problems.

>Pet obesity has only become more a problem recently because more and more pets are keep indoors only, which limits how much exercise they get.

>Also people view pets as members of their families and therefore tend to give them more snacks.

>Dogs actually only need about half as much fat that is contained in most premium dog foods.
